Core180 Expands Proprietary Telecommunications Platform

– Platform Expansion Driven By Growing Customer Needs –

Fairfax, Va. and Hoboken, N.J., February 25, 2008 – Core180, the leading telecommunications network integrator, announced today the expansion of its proprietary telecommunications platform to 16 carrier-neutral facilities (Carrier Hotels). Core180's sites, called CoreNodes, are connected with a high-capacity network to support seamless site-to-site integration.

"Our platform provides a unique advantage for customers to expand their network without the capital cost and operational complexities typically associated with such efforts," says David Baule CEO of Core180. "Through a single interface, customers now have the benefit of accessing services at any of our 16 locations as easily as if it was part of their own infrastructure."

Utilizing the platform, Core180 offers "purpose-built" network designs and deployments that combine the services, carriers and buying strategies from best-in-class providers. This expansion enables users to leverage carrier vendors and experience enhanced network visibility while reducing expense.

Major cities in the Core180 deployment include: Atlanta, Ga., Boston, Mass., Miami, Fla., New York, N.Y., Philadelphia, Pa., Raleigh N.C., and Washington, D.C.

This rapid expansion is being driven by growing demand from Core180 customers. In addition, Core180 was recently selected as the sole network subcontractor and bandwidth manager to assist Virginia-based Arrowhead Global Solutions, Inc. to implement its part of a \$3 billion connectivity assignment for the Defense Information Systems Network (DISN). (See Core180 press release on contract with Arrowhead Global Solutions, Inc. at: www.core180.com.)

About Core180

Core180 (www.core180.com) utilizes its own proprietary platform to develop purpose-built networks for customers. These solutions allow users to better leverage their carrier vendors and enable choice and flexibility in the “last mile” access solutions. The company serves large enterprises, system integrators, government agencies as well as facility and non-facility based telecommunications carriers. Core180 is headquartered in Metro New York (Hoboken, N.J.) with operations in the Washington, D.C. region (Fairfax, Va.).
